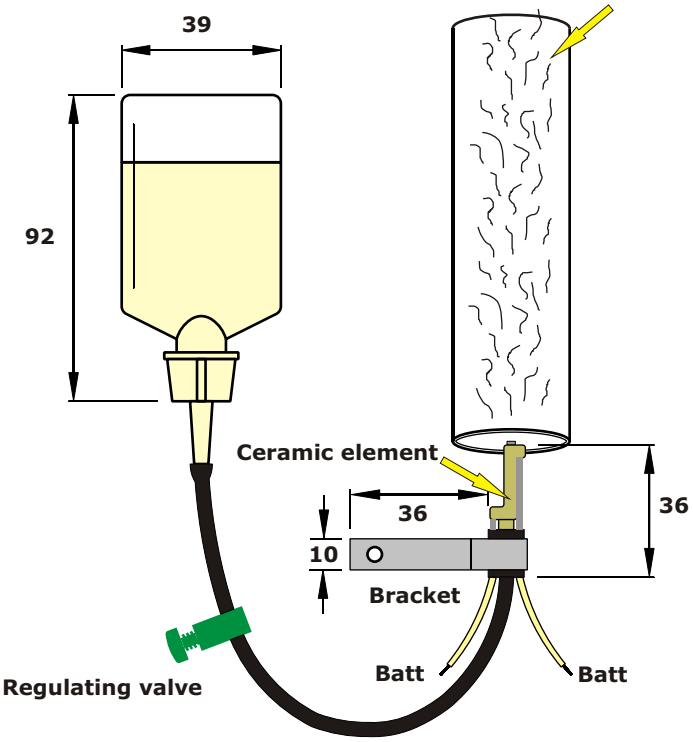
50ml distillate bottle acts as tank; mount slightly higher than element

Plastic flue pipe from element up through inside of funnel directs and augments flow of smoke (flue tube is not supplied)



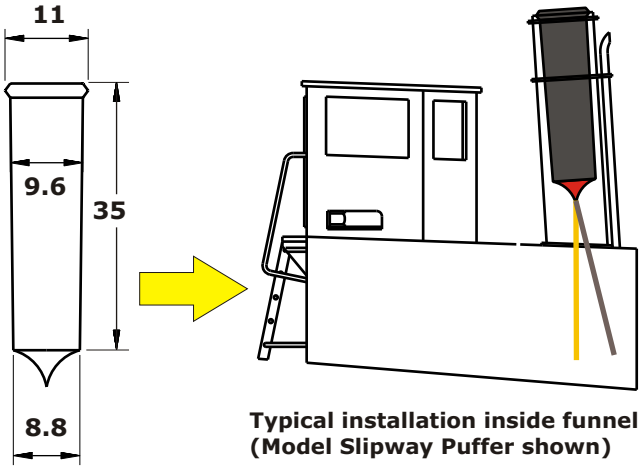
Tube: 3.5mm dia x 185 long

-8v to 14v supply
-Includes 50ml bottle of distillate
-Amount of smoke is variable by adjusting valve or changing operating voltage

S3 Super Smoker Unit

S1 & S2 Mini Smoke Units

- 6v (S1) or 12v (S2) supply
- Designed for small models
- Fills from top of unit
- Includes 10ml bottle of distillate, syringe and filling needle



Typical installation inside funnel (Model Slipway Puffer shown)

All dimensions are approximate

All units can be operated either manually, by including a suitable toggle switch in the connection to the battery, or by R/C using one of our switcher units e.g. P44. Currents drawn by the units in operation are stated by the manufacturer to be as follows:

S1	260 mA
S2	140 mA
S3	700 mA

Units are NOT user-serviceable and should not be tampered with!!
Extra distillate now available in 50ml and 250 ml bottles - See Price List
